

Franeestown Conservation Commission  
Proposed Minutes – Special Work Meeting

June 3, 2019 5:30

Members present: Hardwick, Avery , StJean, Crooker. Public present; Jeff Tarr

Location: Wharton (Fisher Hill) Town Forest) Tax map/Lot 8/63 on Bennington Road

Several piles of old junk, tires, and metal debris were picked up from the forest and left in piles to be picked up later and taken to the transfer station - estimated that there are maybe 4 or so large pickup truck loads to be cleaned up. Also need to go back with wire cutters and remove barbed wire fencing attached to trees. Hardwick will check with Selectmen to make sure it is OK to take debris to the transfer station.

After finishing the clean-up work at the Wharton lot we all went up to East Road. We walked the road and identified town forest access points on that road. We also discussed access issues with the Right-of-Way over land owned by Mountain Maintenance to town forest properties, and the idea of a small parking area on town land near the bottom of the access road. Hardwick will discuss the access/ROW/parking area issue with Board of Selectmen.
